## About Me

---

I am a Full-Stack Developer from Karachi, Pakistan. I build modern websites, mobile apps, and business software like CRM systems and SaaS products. My focus is on creating software that is fast, easy to use, and reliable. I am skilled in JavaScript and TypeScript and use tools such as React, Next.js, Node.js, Nest.js, PostgreSQL, and MongoDB.

I also work as a Back-End Developer and Project Manager at AFA Innovations. There, I am helping create a Fitness AI Application. I manage the back-end development, design the system's structure, and provide advice on the user interface to ensure the app is well-built and meets our goals.

## Skills

---

- **Frontend:** React.js, Next.js, React Native, Tailwind CSS, TypeScript, HTML, CSS
- **Backend:** Node.js, Express.js, Nest.js, MongoDB, PostgreSQL, REST APIs
- **AI:** AI Builder, AI Agent N8N, Vapi AI
- **Tools:** Firebase, Supabase, Cursor, Lovable, Architectural Design, Server-Side Programming

## Experience

---

### Frontend Developer

**Apr 2025 – Present**

*Appollon Digital, Karachi, Pakistan (Full-time, On-site)*

- I design and develop web applications for the FOREX industry, with a focus on creating user interfaces that are easy to use and responsive.
- I work together with different teams to make sure we deliver high-quality solutions that are ready for production.

### Back-End Developer

**Mar 2025 – Present**

*AFA Innovations (Remote)*

- I am currently working as a Project Manager and UI Advisor on a Fitness AI Application that is in active development.
- I am responsible for the back-end development and system architecture and also contribute to the product's user interface design direction.
- I manage collaboration between teams, ensure the system can grow, and align the technical work with business objectives. The app will be launched soon.

### Full Stack Developer

**Jul 2024 – Apr 2025**

*Zenth Solutions, Karachi, Pakistan (Full-time, On-site)*

- As a Junior Full-Stack Developer, I built and maintained web applications using the MERN stack and Next.js, focusing on both front-end and back-end tasks.
- I managed the company's branding and social media, using my design and management skills to improve our online presence.
- I worked with the team to provide scalable and high-quality solutions for our clients.

## Full Stack Developer (Intern)

Oct 2023 – Jul 2024

*POX Solutions (Full-time, Remote)*

- I completed a full-stack internship where I learned about web development and worked on complete projects.
- I developed various website features, including login, signup, two-step authentication, chat functions, and an admin panel.
- I contributed to four full-stack projects, which gave me practical experience in a real-world development setting.

## Projects

---

### Cura AI | AI-Powered Medicine Recommendation

- Developed an AI tool that recommends medicines based on symptoms.
- Designed a mobile-responsive UI with a strong focus on accessibility.

### Attrbyb | Personalization and Conversion Optimization Platform

- I developed a personalization platform for direct-to-consumer businesses using Next.js and AI.
- I built tools for creating visitor profiles and making custom user paths without needing to write code.

### AutoPitch.ai | AI-Powered Sales Research Tool

- I built a software platform that creates personalized tech sales pitches by looking at data from over six different sources.
- The platform uses AI to generate pitches that help sales teams close deals faster.

*Mere paas ye projects freelance he or ye poore mere haath se bane he. Mere paas or bhi projects he lekin mujhe legta he ke ye best he aapko trust dilaane ke liye.*

## Education

---

### Intermediate in Computer Science

2023 – 2025

*Board of Intermediate Education, Karachi, Pakistan*

- Focused on fundamental programming, web development, and computer science ideas, with direct work on software projects.

### Full Stack Web Mobile App Development

Dec 2022 – Dec 2023

*Saylani Mass IT Training (SMIT), Karachi, Pakistan*
