Professional Summary

I am a Full-Stack Software Developer from Karachi, Pakistan, specializing in building modern, fast, and user-friendly websites, mobile applications, CRM systems, and SaaS products. I am proficient in JavaScript and TypeScript, utilizing technologies such as React, Next.js, Node.js, Nest.js, and React Native, alongside databases like PostgreSQL and MongoDB.

In addition to my professional roles, I actively develop personal projects, including Log Vwer, a logging tool for Node.js developers. I also contribute as a part-time Back-End Developer and Project Manager at AFA Innovations on a Fitness AI Application. In this role, I oversee back-end development, system architecture, and provide UI/UX direction, ensuring the application is scalable, reliable, and aligned with business objectives.

Skills

- **Frontend:** React.js, Next.js, React Native, Tailwind CSS, TypeScript, HTML, CSS
- **Backend:** Node.js, Express.js, Nest.js, MongoDB, PostgreSQL, REST APIs
- **Other Tools:** TypeScript, Firebase, Supabase, Architectural Design, Server-Side Programming

Experience

Frontend Developer

Apr 2025 – Present

Appollon Digital, Karachi, Pakistan

- Designing and developing FOREX web applications with a focus on intuitive and responsive user interfaces.
- Collaborating with cross-functional teams to deliver high-quality, production-ready solutions.

Open-Source Creator

May 2025 – Present

Self-employed, Remote

- Built and published `log-vwer`, a logging tool for Node.js developers, to view, filter, and store logs via a web dashboard.
- Actively develop and maintain other open-source projects, contributing to the developer community.

Full Stack Developer

Jul 2024 – Apr 2025

Zenth Solutions, Karachi, Pakistan

- Developed and maintained production-level MERN/Next.js full-stack applications with a focus on high performance and scalability.
- Led branding and social media strategy, increasing the company's visibility and online presence.

Note: Previous roles include internships and early-career positions that helped build a strong foundation in front-end and full-stack development.

Projects

Log Vwer | Real-time Log Viewer for Node.js

- A simple and powerful logging tool for Node.js developers that provides a clean web dashboard for viewing application logs.
- Features include live log viewing, easy search and filtering, and storage options for MongoDB, files, or memory.
- *Skills:* Node.js, MongoDB, Web Sockets

Attryb | Personalization and Conversion Optimization Platform

- Developed an AI-powered D2C personalization platform using Next.js.
- Built visitor profiling and no-code tools to create custom user journeys.
- *Skills:* Next.js, AI Integration, Full-Stack Development, Tailwind CSS

AutoPitch.ai | AI-Powered Sales Research Tool

- Built a SaaS platform that creates personalized tech sales pitches by analyzing data from over six sources.
- Implemented AI-based pitch generation to help sales teams accelerate deal closures.
- *Skills:* Next.js, OpenAI API, MERN Stack, SaaS

Education

Intermediate in Computer Science

2023 – 2025

Board of Intermediate Education, Karachi, Pakistan

- Focused on foundational programming, web development, and computer science principles, with hands-on projects in software development.

Full Stack Web Mobile App Development

Dec 2022 – Dec 2023

Saylani Mass IT Training (SMIT), Karachi, Pakistan

Value-Added Activities

- Created and maintained three widely used NPM packages that improve developer workflows.
- Actively share content and insights on LinkedIn and X around SaaS, AI, and full-stack engineering.
- Continuously learning AI, ML, and Data Science to integrate smarter solutions into apps.
