SUMMARY

I am a Full Stack Developer specializing in building scalable web and mobile applications using TypeScript, React, Next.js, and Node.js. I create SaaS products, CRM systems, and AI-powered tools that solve real business problems. Currently, I drive technical development at prAlsm and Appollon Digitals. Beyond my job, I actively contribute to open source (Log Vwer) and have successfully delivered over 35 freelance projects. I focus on writing clean code and building user-friendly systems. I am a strong problem solver who works well in teams. My goal is to build software that helps businesses grow and makes daily tasks easier for users.

SKILLS

- **Frontend:** React.js, Next.js, React Native, Tailwind CSS, TypeScript, HTML, CSS
- **Backend:** Node.js, Express.js, Nest.js, MongoDB, PostgreSQL, Supabase, Firebase
- **AI & Automation:** n8n, OpenAI Integration, Vapi AI
- **Tools:** System Design, NPM Package Creation, Git, Cursor, REST APIs

EXPERIENCE

Software Engineer

Feb 2026 – Present

prAlsm (formerly AFA Innovations) | Remote

- I work as a Project Manager and UI Advisor for a Fitness AI Application.
- I handle the back-end development and system design.
- I help the team make decisions about the user interface to ensure the app is easy to use.
- I manage the work between different teams and ensure the technical plans match our business goals.

Frontend Developer

Apr 2025 – Present

Appollon Digitals | Karachi, Pakistan

- I design and build web applications for the FOREX industry.
- I focus on creating user interfaces that are responsive and simple for users to understand.
- I work with the team to deliver high-quality software that is ready for public use.

Full Stack Developer

Jul 2024 – Apr 2025

Zenth Solutions | Karachi, Pakistan

- I built and maintained web applications using the MERN stack and Next.js.
- I managed the company's branding and social media to improve our online image.
- I worked on both front-end and back-end tasks to provide good solutions for our clients.

Full Stack Developer (Intern)

Oct 2023 – Jul 2024

POX Solutions | Remote

- I learned web development and worked on full-stack projects.
- I built features like login systems, two-step authentication, chat functions, and admin panels.
- I helped complete four different projects, which improved my coding skills.

Internship Trainee

Mar 2023 – Oct 2023

Dawat-e-Islami | Karachi, Pakistan

- I built reusable frontend components using HTML, CSS, JavaScript, and React.
- I handed these components over to senior developers to use in larger systems.

PROJECTS

Log Vwer | Open Source NPM Package

- I created a logging tool for Node.js developers.
- It shows live logs on a web dashboard and allows users to filter them easily.
- It supports storing logs in MongoDB, files, or memory to make debugging faster.

Cura AI | AI-Powered Medicine Recommendation

- I developed an AI tool that suggests medicines based on the symptoms a user has.
- The design works well on mobile phones and is easy for everyone to use.

Attryb | Personalization Platform

- I developed a platform for businesses using Next.js and AI.
- I built tools that let users create visitor profiles and custom paths without writing code.

AutoPitch.ai | Sales Research Tool

- I built a platform that uses AI to create personalized sales pitches.
- The system looks at data from many sources to help sales teams close deals faster.

EDUCATION

BS in Computer Science (BSCS)

2025 – 2029

Iqra University, Karachi, Pakistan

Full Stack Web & Mobile App Development

Dec 2022 – Dec 2023

Saylani Mass IT Training (SMIT), Karachi, Pakistan
